Sources of the Thames.

After a long ascent you come to some solitary grassy hills; on the top of these under the shade of two or three alders, is a little group of splashy springs, which trickle away, forming as far as the eye can follow them an insignificant brook. Such is the modest infancy of the proud Thames. I felt a tile of poetry come over my mind, as I though! how, but a few hours ago, and but few miles hence, I had seen these more ships, more treasures, and more human beings than any of its colossal breathren; how the capital of the world lies on its banks, and by its omnipotent commerce may be almost said to rule the four quar-

ters of the globe. With reverential admiration I looked upon the gushing drops, and compared them one while with Napoleon, who obscurely in Ajaccio in a few years made all the thrones of the earth tremb'e then with the avalanche which, loosened from its beil under the foot of a sparrow, in five minutes buries a village; then with Rothschild, whose father sold obbons, and without whose assistance no power in Enrope seems now able to carry on a war. - Tour of a Foreigner.
